Note: The ARV-CWT designation indicates a chinook with an adipose-right ventral finclip, which was also coded-wire tagged. The A-CWT (P) designation indicates an adipose-clipped and coded-wire tagged chinook that also has a photonic mark on the anal fin. A photonic mark is an air-injected latex polymer that is being tested on chinook salmon.

Many lake trout and chinook salmon have been adipose-clipped to indicate they carry a tiny coded wire tag (CWT) in their snout. A trained technician must find and decode these tags to determine stocking information. This information is important for the future management of Lake Michigan. Please take these fish to one of the collection stations located in each lakeshore community or call one of the DNR field stations listed below:

LOCATION

Wisconsin Department of Natural Resources provides equal opportunity in its employment, programs, services, and functions under an Affirmative Action Plan. If you have any questions, please write to Equal Opportunity Office, Department of Interior, Washington, D.C. 20240.

This publication can be made available in alternative formats (large print, Braille, audio-tape, etc.) upon request. Please call (414) 382-7929 for more information.

WISCONSIN LAKE MICHIGAN FIN CLIP SUMMARY 1990-2000 MARKED FISH ONLY

These fin clip patterns are for the Lake Michigan and Green Bay waters of the <u>State of Wisconsin</u> only. Trout and salmon with other fin clip patterns can originate from other states, and would be considered "strays" in Wisconsin Waters. Fin regeneration makes some clips difficult to see. <u>Note:</u> These are not total numbers of trout and salmon stocked, only those that have been fin clipped.

*Tagged fish: Many fish are tagged with plastic floy tags. These include: PERCH, WALLEYE, LAKE TROUT, RAINBOW TROUT (STEELHEAD), NORTHERN PIKE, SMALLMOUTH AND LARGEMOUTH BASS, BROOK TROUT, AND BROWN TROUT. Your cooperation in returning these tags to the address below or the address listed on the tag, along with the length, weight (if known), date and location caught will be greatly appreciated. This information will help us make the Lake Michigan fishery even better.

*When releasing a tagged fish, please leave the tag in place.
